## Frontend Developer | React | JavaScript

Dear Hiring Manager,

I am writing to express my strong interest in joining your frontend engineering team. As a Frontend Engineer with 7+ years of production experience at Zoho Corporation, I have delivered high-performance, accessible web interfaces for global enterprise markets, with a specialized focus on the Japanese landscape. I am eager to bring this expertise in internationalization and technical excellence to your forward-thinking team.

At Zoho, I have been the core frontend developer for our Japan market products, serving thousands of enterprise customers. My key contributions include:

- Building the Zoho CRM Japan Academy learning platform from the ground up, implementing secure authentication, user tracking, and progress monitoring in a fully localized environment.
- Ensuring WCAG 2.1 AA compliance across all international websites, implementing semantic HTML, ARIA attributes, and keyboard navigation for enterprise accessibility standards.

I am proficient in modern React and TypeScript through hands-on project development and production workflows. My experience building scalable, accessible interfaces for diverse international users has prepared me to contribute immediately to complex frontend challenges.

I am fully committed to **international relocation** and am prepared to begin the visa sponsorship process. Having worked on products serving global markets at Zoho, I understand the importance of cultural adaptability, cross-functional collaboration, and building inclusive user experiences.

I look forward to the opportunity to discuss how my experience and skills can drive similar, or greater, successes at your company. Please feel free to contact me at your earliest convenience to arrange an interview.

Thank you for your consideration.

Warm regards,

Vigneshwar S

Frontend Developer
