

Vigneshwar

Senior Frontend Engineer

Dear Hiring Manager,

I'm a Senior Frontend Engineer with 8 years of experience working at the intersection of product engineering, platform systems, and AI-driven tooling.

At Zoho, I led frontend architecture for the Japan CRM Academy platform, delivering a high-performance, localised learning system that improved sign-up conversion by ~30% and supported global product adoption. Beyond feature delivery, I focused on platform-level impact — designing reusable Web Component systems, improving Core Web Vitals, and enabling scalable i18n and RTL support across products.

More recently I've been building AI-powered developer tooling — UI scaffolding systems, structured multi-step LLM workflows, and internal automation tools that reduce manual effort and accelerate frontend delivery. I approach AI not just as a productivity shortcut, but as a system-level discipline to improve engineering efficiency at scale.

I'm particularly drawn to roles where frontend engineering, developer experience, and AI intersect — building shared systems and tooling that create high-leverage impact across engineering teams.

I'm based in Chennai, India, and open to relocation with visa sponsorship.

I'd love to bring this experience to your team and discuss how I can contribute.

Best regards,

Vigneshwar S
