SUMMARY

Senior Web Developer (Frontend) with 8+ years of experience designing, developing, and maintaining scalable web applications, reusable UI systems, and enterprise websites for global SaaS products. Experienced in frontend architecture, localisation, performance optimisation, accessibility, and AI-assisted development workflows. Passionate about building maintainable, high-quality user experiences while improving developer productivity through reusable engineering solutions.

WORK EXPERIENCE

ZOHO Corporation

Feb. 2020 – Present

Senior Web Developer (Frontend)

Chennai, India

Zoho is a global SaaS company serving 100M+ users across 180+ countries.

- Designed, developed, and maintained scalable frontend applications, enterprise websites, and reusable UI systems using HTML, Pug, CSS, LESS/SCSS, JavaScript, and Web Components.
- Designed, built, and maintained the Japan CRM Academy learning platform, including authentication, user registration, bookmarks, REST API integrations, and localisation, improving sign-up conversion by approximately 30%.
- Developed and maintained frontend functionality for Zoho CRM, Zoho Desk, and Zoho Campaigns websites for the Japan market, delivering localised user experiences aligned with regional business requirements.
- Developed event websites, registration portals, and landing pages for Zoholics Japan, implementing internationalisation (i18n), localisation, and multilingual support across global product deployments.
- Designed and implemented reusable Web Component libraries, shared UI components, and frontend architecture standards to improve consistency, maintainability, and development efficiency across products.
- Built and enhanced frontend modules, interface components, and product pages for ManageEngine websites using HTML, LESS, and Web Components.
- Developed and configured chatbot workflows and business logic for ManageEngine websites using Zoho Deluge.
- Designed and developed browser extensions and internal productivity tools to automate SEO validation, content verification, and workflow automation, reducing manual QA effort by approximately 25%.
- Leveraged Claude, Cursor, GitHub Copilot, and Figma MCP to accelerate frontend development, enabling rapid delivery of production-ready screens while maintaining consistent design implementation.
- Optimised web performance using PageSpeed Insights and Core Web Vitals (LCP, CLS, FID), improving page performance through systematic debugging, lazy loading, critical CSS, and bundle optimisation across high-traffic product pages.
- Implemented WCAG 2.1/2.2 accessibility standards across Zoho Japan websites, including ARIA attributes, keyboard navigation, semantic HTML, and screen reader compatibility.
- Managed source code using Git, performing branch management, code reviews, pull requests, and merge conflict resolution within collaborative development teams.
- Collaborated with Zoho Japan stakeholders to translate business requirements into scalable frontend solutions, contributing to architecture decisions and successful delivery of regional product enhancements.

K2B Solutions

Jan. 2018 – Feb. 2020

UI Developer

Chennai, India

- Developed and maintained frontend implementation for Bluestone98 (UK client), an Awwwards-recognised website, using HTML, CSS, and JavaScript.

- Developed frontend features, responsive layouts, and UI enhancements for Sherridon Homes Australia.
- Developed and maintained frontend components, UI updates, and WordPress customisations for Unicorn Dating Website
- Contributed to frontend components and UI enhancements for Singapore Land Authority enterprise applications.
- Collaborated with designers and stakeholders to translate requirements into responsive web applications.
- Performed browser compatibility testing, debugging, performance improvements, and ongoing maintenance across client projects.

SKILLS

Frontend Development:

HTML5, CSS3, LESS, SCSS, JavaScript (ES6+), jQuery, React, TypeScript, Web Components, Pug

Application Development:

REST API Integration, Authentication & Authorization, Responsive Web Design, Localisation (i18n), Browser Extension Development, Chatbot Workflow Development (Zoho Deluge)

AI & Automation

LLM Workflows (Claude, OpenAI GPT, Cursor), Prompt Engineering, MCP (Model Context Protocol), Figma MCP, Multi-Agent Workflows, UI Scaffolding Systems, Workflow Automation, Chrome Extension Development

Performance, Accessibility & SEO

Core Web Vitals (LCP, CLS, FID), Technical SEO, Structured Data, Meta Optimisation, Sitemap Management, WCAG 2.1/2.2, Semantic HTML, ARIA, Keyboard Navigation, Lazy Loading, Code Splitting, Critical CSS, Cross-browser Compatibility

State & Data Management:

Redux Toolkit, RTK Query, Context API, Axios, Fetch API

Tools & Workflow:

Git, Vite, Webpack, npm, Figma, GitHub Copilot

KEY PROJECTS

Japan CRM Academy:

Built and localized a production learning platform for the Japan CRM product, improving sign-up conversion by approximately 30%.
(**Tech:** JavaScript, SCSS, REST APIs, i18n)

AI Productivity & Automation Tools:

Developed AI-assisted Chrome extensions and internal tools to automate SEO checks and UI validation, reducing manual review effort by ~30% and accelerating frontend workflows. (**Tech:** JavaScript, Chrome Extension, GPT, Claude APIs.)

JobHunter Chrome Extension:

AI-assisted Chrome Extension that analyzes job listings from LinkedIn, Seek, and other job portals, highlights relevant skills, identifies visa sponsorship opportunities, and streamlines overseas job applications. (**Tech:** JavaScript, Chrome Extension, Claude)

EDUCATION

Anna University, Jawahar Engineering College

Bachelor of Engineering, Electronics & Communication Engineering

2013 – 2017
Chennai, India

LANGUAGES

English (Professional), Tamil (Native), Sourashtra (Conversational)
