

Vigneshwar

Senior Web Developer (Frontend)

Dear Hiring Manager,

I am a **Senior Web Developer (Frontend)** with over **8 years of experience** building scalable web applications, enterprise websites, and reusable frontend systems for global SaaS products. Throughout my career at Zoho, I have focused on creating high-quality user experiences while improving performance, accessibility, localisation, and development efficiency across multiple products.

My experience includes designing and maintaining production applications, developing reusable Web Component libraries, integrating REST APIs, optimizing Core Web Vitals, implementing WCAG accessibility standards, and collaborating with cross-functional teams to deliver solutions that meet both business and user needs. I have also built internal tools and browser extensions that automate repetitive workflows and improve engineering productivity.

Alongside my frontend expertise, I actively leverage modern AI-assisted development workflows using tools such as Claude, Cursor, GitHub Copilot, and Figma MCP to accelerate delivery, improve code quality, and streamline engineering processes. I enjoy learning new technologies and continuously improving the way software is designed, built, and maintained.

What particularly attracts me to this opportunity is the chance to contribute to a team that values engineering excellence, collaboration, and continuous improvement. I enjoy solving complex frontend challenges, building maintainable systems, and creating products that deliver meaningful value to users.

I am currently based in **Chennai, India**, and am open to **international relocation**. I would welcome the opportunity to discuss how my experience and technical background can contribute to your team.

Thank you for your time and consideration. I look forward to hearing from you.

Kind regards,

Vigneshwar S
