PROFESSIONAL SUMMARY

Web Developer and Frontend Engineer with 8+ years of professional experience designing, developing and maintaining frontend software applications, product websites and web-based user interfaces for enterprise software companies. Experienced in full frontend development lifecycle including requirements analysis, UI design and implementation, REST API integration, testing, debugging and deployment. Skilled in building reusable component libraries, authentication systems, localisation frameworks, browser extensions, and web performance optimisation for large-scale enterprise applications.

WORK EXPERIENCE

ZOHO Corporation — Chennai, India

Web Developer (Frontend) | Feb 2020 – Present

- Designed, developed and maintained frontend software applications, product websites and web-based user interfaces using HTML, Pug, CSS, LESS/SCSS, JavaScript and Web Components for enterprise products
- Designed, built and maintained Japan CRM Academy learning platform, including authentication systems, user registration workflows, bookmarks functionality, REST API integrations and localisation modules
- Developed and maintained frontend functionality for Zoho Japan product websites including Zoho CRM, Zoho Desk and related product platforms, aligning with regional workflows and Japanese market requirements
- Developed event websites, registration portals and landing pages for Japan-based conferences (Zoholics) and implemented internationalisation (i18n), localisation and multilingual support across global product deployments
- Designed and implemented reusable Web Component libraries, defining component interfaces and integration standards, alongside shared UI libraries and frontend architecture standards to improve consistency and maintainability across products
- Developed and maintained frontend modules, interface components and product pages for ManageEngine websites using HTML, LESS and Web Components
- Developed and configured chatbot workflows and business logic for ManageEngine websites using Zoho Deluge scripting
- Designed and developed browser extensions and productivity tools to automate SEO validation, content verification and workflow automation
- Utilised AI-assisted development tools including Claude, Cursor and GitHub Copilot to accelerate component development, code generation and engineering workflows
- Managed source code using Git version control, performing branch management, code reviews, pull requests and merge conflict resolution
- Optimised web performance using PageSpeed Insights and Core Web Vitals metrics (LCP, CLS, FID), identifying and resolving technical deficiencies through systematic debugging, lazy loading, critical CSS and bundle optimisation across high-traffic product pages

- Implemented WCAG 2.1/2.2 accessibility standards across Zoho Japan websites including ARIA attributes, keyboard navigation, semantic HTML and screen reader compatibility for enterprise users
- Analysed business requirements in technical planning meetings with Zoho Japan stakeholders, translating specifications into scalable frontend solutions and producing architecture documentation and component guidelines for team-wide standards

K2B Solutions — Chennai, India

Trainee - UI (Jan 2018 – Jun 2019) | **UI Developer** (Jul 2019 – Feb 2020)

- Developed and maintained frontend implementation for Bluestone98 website (UK client), an Awwwards-recognised project, using HTML, CSS and JavaScript
- Developed frontend features, user interface enhancements and responsive layouts for Sherridon Homes Australia real estate website
- Developed and maintained frontend components, user interface updates and WordPress customizations for Unicorn Dating website
- Developed and contributed to frontend components and UI updates for Singapore Land Authority enterprise
- Modified and maintained existing website features and user interface components based on business requirements
- Developed and maintained email templates using PHPMailer
- Collaborated with designers and stakeholders to translate business requirements into responsive web applications
- Performed browser compatibility testing, responsive layout enhancements, debugging and performance improvements
- Maintained code quality, mobile responsiveness and usability, including bug fixing and ongoing maintenance across web applications and client projects

TECHNICAL SKILLS

Frontend Development:

HTML5, CSS3, LESS, SCSS, JavaScript (ES6+), jQuery, TypeScript, React, Web Components, Pug

Application Development:

REST API Integration, Authentication & Authorization Systems, Localisation (i18n), Responsive Web Design, Browser Extension Development, Chatbot Workflow Development (Zoho Deluge)

Performance & Accessibility:

Core Web Vitals (LCP, CLS, FID), WCAG 2.1/2.2, Semantic HTML, ARIA Attributes, Keyboard Navigation, Lazy Loading, Code Splitting, Critical CSS, Cross-browser Compatibility

SEO & Standards:

Technical SEO, Structured Data, Meta Optimisation, Sitemap Management

State & Data Management:

Redux Toolkit, RTK Query, Context API, Axios, Fetch API

Tools & Workflow:

Git (Branch Management, Code Reviews, Pull Requests, Merge Conflict Resolution), Vite, Webpack, npm, Figma, GitHub Copilot, Claude, Cursor

EDUCATION

Jawahar Engineering College | Anna University — Chennai, India | 2013 – 2017

Bachelor of Engineering (Electronics & Communication Engineering)

LANGUAGES

English (Professional), Tamil (Native), Sourashtra (Conversational)
