Dear Hiring Manager,

I am writing to express my interest in the Web/UI Developer position with Transport for NSW.

I have over eight years of frontend development experience, including more than six years at Zoho, where I have built and maintained enterprise web applications for ManageEngine and Zoho Japan. My experience includes developing responsive and accessible user interfaces, building reusable Web Components, improving application performance, integrating with backend APIs, and maintaining large enterprise codebases.

Accessibility and maintainability have been an important part of my work. I have implemented WCAG best practices, worked with reusable component libraries, and optimized applications using techniques such as Core Web Vitals improvements, image optimization, lazy loading, and frontend performance tuning. I enjoy solving complex problems and collaborating with cross-functional teams to deliver reliable, user-focused solutions.

I am also passionate about improving engineering workflows and have been using AI tools such as Claude, Cursor, and GitHub Copilot to accelerate development while maintaining code quality and consistency.

Although I am currently based in India and do not yet have Australian work rights, I am **actively pursuing Australian Skilled Migration** through the Subclass 190/491 pathway and am fully committed to relocating to Australia. If there is an opportunity to be considered now or in the future, I would be grateful for the chance to discuss how my experience can contribute to your team.

Thank you for your time and consideration. I look forward to hearing from you.

Kind regards,

Vigneshwar
