SUMMARY

Senior Frontend Engineer with **8 years of experience** building scalable, high-performance web applications with strong focus on frontend architecture, reusable UI systems, and polished user experiences.

Experienced in building enterprise-grade workflow-driven applications, collaborating closely with design and backend teams, and leveraging AI-assisted tooling to improve developer productivity and user experience quality.

WORK EXPERIENCE

ZOHO Corporation — Chennai, India

Web Developer (Frontend) | Feb 2020 – Present

- Owned frontend development for **Japan CRM Academy**, improving **sign-up conversion by ~30%** through performance and UX improvements

Frontend Architecture & Design Systems

- Designed and implemented scalable frontend architecture and reusable UI systems supporting complex product workflows
- Built maintainable component structures and reusable frontend patterns to improve consistency and developer efficiency
- Contributed to scalable frontend implementation approaches balancing usability, performance, and maintainability

Product UX & Performance

- Built responsive, high-performance interfaces focused on usability and polished user interactions
- Led Core Web Vitals optimisation (LCP, CLS, FID), improving responsiveness and user experience quality
- Designed frontend experiences handling asynchronous workflows, loading states, and resilient error handling

Engineering Quality & Collaboration

- Collaborated closely with UX designers and backend engineers to shape frontend implementation approaches and API-driven experiences
- Participated in architectural discussions, technical planning, and code reviews to improve engineering quality
- Contributed to CI/CD workflows and debugging efforts to maintain production reliability

AI & Productivity Engineering

- Leveraged AI-assisted development tools such as **Claude, Cursor, and GitHub Copilot** to accelerate development workflows and improve engineering productivity
- Built internal automation tooling and AI-assisted workflows to reduce repetitive tasks and improve consistency

UI Developer | Jan 2018 – Feb 2020

- Built scalable UI applications for international clients (UK, Singapore, Australia)
- Delivered an **Awwwards-recognised website**, demonstrating strong UI engineering and UX execution

SKILLS

Frontend:

React, TypeScript, JavaScript (ES6+), HTML5, CSS3, SASS/LESS

Architecture & Systems:

Design Systems, Component-driven development, Micro Frontends, Web Components, i18n

Performance & UX:

Core Web Vitals (LCP, CLS, FID), Accessibility, Performance optimisation, UX-focused engineering

Engineering Practices:

CI/CD pipelines, Code Reviews, Debugging, Production Support, Agile

State & APIs:

Redux Toolkit, RTK Query, Context API, REST APIs

Tools:

Webpack, Vite, Git, npm, Figma, Claude, Cursor, GitHub Copilot

KEY PROJECTS

Japan CRM Academy: Built and optimized a production platform improving conversion by ~30% through performance and UX improvements (*Tech: JavaScript, SCSS, REST APIs, i18n*)

AI Productivity & Automation Tools: Developed AI-assisted workflows and internal tooling to improve engineering productivity (*Tech: JavaScript, Chrome Extension, Claude APIs*)

JobHunter Chrome Extension (In Development): AI-assisted job matching tool for LinkedIn, Glassdoor, and Indeed that highlights keywords, detects visa sponsorship indicators, and scores job fit from 0–100 (*Tech: JavaScript, Chrome Extension, Claude*)

EDUCATION

Anna University, Jawahar Engineering College — Chennai, India | 2013 – 2017

Bachelor of Engineering (Electronics & Communication Engineering)

LANGUAGES

English (Professional), Tamil (Native), Sourashtra (Conversational)
